- **Database languages** : MySQL,Oracle.
- **Technologies :** Git , Full stack
- **Libraries :** Pandas,Numpy Matplotlib
- **Freamwork** : Django, Angular
- **Editor** : Pycharm , VS Code

PROJECTS

- **E-Commerce Web Application** : The Online Musical Store project utilizes a combination of technologies and tools such as Python, Django, MySQL, HTML, CSS, and Javascript. Designed within the e-commerce domain, this online platform offers a seamless experience for users to browse, purchase, and sell musical instruments from the comfort of their homes.

- **Q&A Web Application :** This project is a web-based question-and-answer platform similar to Quora, built using Django. Users can register, log in, and interact within the platform by asking questions and providing answers. The key features include user authentication, question posting, answering questions, and viewing a list of questions posted by individual users.

- **Personal Portfolio** : The Portfolio project is a showcase of personal achievements and professional prowess, employing fundamental technologies such as HTML, CSS, and Javascript. Serving as a digital resume, this platform compiles a comprehensive collection of my work, illustrating my skills, expertise, and notable accomplishments.
